

### Drum Stick Kit Instructions:

Kit Includes: Stick, Padding, Sinew, and a piece of Buckskin.

1. Put glue on one end of stick covering 1" down around the whole stick.
2. Wrap Padding/blanket around end of stick that you glued, snugly not to tight.
3. Use sinew and wrap around padding a dozen times crisscrossing. Then tie off on stick below the padding.
4. Center Buckskin on the padded end, pull down stick and hold snug below padding, then wrap sinew very tightly around Buckskin and stick about 7-9 times. Make a knot or two then cut off any excess sinew (leave about a quarter inch) You can also cut the extra blanket that makes a skirt, totally up to you!
