Preparing Your Hide

Preparation for Custom Tanning – LEATHER

- Remove excess flesh (fat, meat)
- Lay skin hair side down and stretch the skin to prevent folds and wrinkles. Avoid laying hide on the concrete
- Apply the 1ST HEAVY coating of salt for 24 hours. Make sure to salt the outside flaps of the hide. **DO NOT USE ROCK SALT**
- Shake/brush off the 1ST application of salt best of ability.
- Apply a 2nd HEAVY coating of FRESH SALT for another 24-hours. Make sure to rub the salt into the hide.
- After the 2nd salting, hang hair side-down over a wooden 2x4 or PVC pipe. Hang by mid neck preferably and not touching the ground.
- When the skin has dried to about 80% dry and whitens with slight flexibility, it is time to fold your hide.
- This method will make the hide a lighter weight and will lower the shipping costs.

Custom Tanning

ORDER FORM FOR CUSTOM LEATHER TANNING 2026 SEASON

DROP OFF DATE: _____

NAME: _____

EMAIL: _____ PHONE: _____

BILLING/SHIPPING: _____

PLEASE INDICATE BELOW FOR THE CORRECT SPECIES & QUANTITY.
